SKILLS React, JavaScript, Redux, TDD, HTML5, CSS3, PostgreSQL, Git, Python, Flask, SQLAlchemy

PROJECTS

OpenBelly (JavaScript, HTML5, CSS3, Python, Flask, PostgreSQL, React, Redux)

[Live Site](#) | [Github](#)

- Implemented validation logic that identifies reservations with overlapping dates and limit reservations in a certain amount of time
- Used Async functions to randomly display a list of pictures one by one.
- Sorted the user's reservations into two different groups (upcoming and past) and list all in the user's profile page.

Artygram (JavaScript, HTML5, CSS3, Python, Flask, PostgreSQL, React, Redux, React-Particles)

[Live Site](#) | [Github](#)

- Designed a method to follow/unfollow a user by clicking on the same button.
- Used React Particles library to generate a fancy background.
- Implemented that only displays the posts from the users that the logged in user is following.

Yummyelp (JavaScript, HTML5, CSS3, PostgreSQL, React, Redux, Express)

[Live Site](#) | [Github](#)

- Used Sequelize to handle and save all the incoming data and retrieve the needed information for frontend
- Created a feature that only the logged in user can leave a comment for the restaurant.
- Used BCrypt Hashing Function to implement a function that users can log in and log out of the site.
